

## ComLine Named Distributor for EvertzAV Products in Europe

**Flensburg, Germany, Wednesday, May 20, 2026** – ComLine, the high-performance value-added distributor based in Flensburg, and Evertz, the world’s leading developer of AV-over-IP solutions, today announced a strategic partnership under which ComLine will distribute EvertzAV solutions—including the IPMX-certified NUCLEUS product line—in Europe. The partnership was finalized during SRF postNAB 2026 and marks an important step toward the widespread adoption of modern, IP-based AV technologies in the European market.

The agreement expands ComLine’s growing portfolio with powerful, scalable, and user-friendly AV solutions from EvertzAV. At the heart of this is NUCLEUS, an AV-over-IP system that stands out for its simple configuration, ultra-low latency, and reliable, future-proof hardware. The combination of NUCLEUS Session Manager and UXP gateways enables flexible, interoperable, and high-quality AV workflows—from meeting rooms and yachts to city halls and arenas.

**Kai Cornehl, Product Manager for 3D & Video at ComLine:** “Today’s customers expect AV-over-IP solutions that are not only easy to configure but also support interfaces to standards such as IPMX or Dante AV and can be seamlessly integrated with off-the-shelf network technology (COTS switches). The NUCLEUS product line combines performance, flexibility, and reliability—exactly what our customers expect and is now finally available.”

**Sebastian G. Ruchti, Regional Sales Manager DACH at Evertz:** “This collaboration strengthens the presence of our AV-over-IP platform in Europe and underscores our commitment to making complex installations reliable and easy to implement. With ComLine’s proven ProAV and broadcast expertise—for example, ComLine operates its own test and demo lab—EvertzAV is ideally positioned to further establish the NUCLEUS® product line in the market and to attract new partners for modern AV-over-IP solutions.”

###

### About EvertzAV

EvertzAV (<https://av.evertz.com>) is a division of Evertz Microsystems (TSX:ET, <https://www.evertz.com>) exclusively focused on the professional AV marketplace and offering the most complete end-to-end solutions for AV distribution and visualization. EvertzAV market leading MMA10G and Nucleus systems are designed and manufactured in Canada leveraging more than 25 years of R&D and Market experience in the A/V, Broadcast and Television industries. EvertzAV, a division of Evertz, are members of SMPTE, AIMS, and VSF.

### About ComLine

ComLine, headquartered in Flensburg, was founded in 1992 as an IT distributor with a special focus on the creative AV and Apple markets. Today, with over 130 employees, ComLine offers its manufacturers excellent marketing and channel strategies in Germany, Austria, Switzerland, France, the UK, the Nordics, and Eastern Europe.

In addition to reliable and fast logistics, resellers expect ComLine to provide additional services that are essential for success in today's IT business: software cloud services, renewal management, CRM as a Service, deployment for mobile devices, and, of course, custom CTO configurations.

ComLine has been voted one of the best wholesalers by German resellers on multiple occasions.
