

**FOR IMMEDIATE RELEASE****EvertzAV Showcases DreamCatcher™ BRAVO Studio and Studer Audio for Live Production at InfoComm 2025**

Burlington, Canada. June 3, 2025: EvertzAV, a division of Evertz Microsystems Ltd., will showcase the latest enhancements to its DreamCatcher™ BRAVO Studio virtual production suite and Studer Audio solutions at InfoComm 2025 (Booth 1910), between 9-11 June, reinforcing its leadership in corporate and enterprise live production.

Visitors to the EvertzAV booth can experience how BRAVO Studio and Studer Audio empower corporate teams to produce live events, including product launches, AGMs, town halls and more, with the same sophistication as large-scale television productions.

DreamCatcher™ BRAVO Studio is the all-in-one, collaborative production platform that offers continuous recording of all sources, content playback, live video/audio switching, replays, graphics and more. Its latest data-driven machine learning (ML) co-pilots and IQs assist production teams by automating clip creation, playlist management, and story assembly, maximizing creativity and efficiency.

BRAVO Studio's advanced features, combined with its remote-access virtual control room capability, have made it the platform of choice for some of the world's largest media organizations.

For audio mixing, BRAVO Studio integrates with Studer Vista digital mixing consoles, offering full-featured audio capabilities either through multi-fader mixing consoles or Evertz VUE for remote control. InfoComm visitors can see Studer 32-fader Vista V in action, including remote control capabilities and full VISTA in VUE connectivity.

EvertzAV experts will be on hand at Booth 1910 to demonstrate the BRAVO Studio suite and Studer Vista, answer technical questions, and discuss how these solutions can elevate corporate live productions. To book an appointment with the team, please email avsales@evertz.com
