FOR IMMEDIATE RELEASE

EvertzAV Showcases NEXX Processing and Routing Solutions with FX-LINK at InfoComm 2025

Burlington, Canada. June 5, 2025: EvertzAV, a division of Evertz Microsystems Ltd., will spotlight its advanced NEXX processing and routing platform and the new FX-LINK expansion architecture at InfoComm 2025, offering enterprise-grade routing solutions built for the future of broadcast and AV convergence.

Ideal for live venues, stadia, and theatres, NEXX supports 12G-SDI routing and processing for pristine UHD workflows. As part of EvertzAV Enterprise Broadcast solutions, the NEXX platform provides the resilience and reliability required in the media broadcast space to the Pro AV market. The advanced capabilities of the NEXX platform, including frame synchronization, conversion and multi-viewing, provide Pro AV customers unmatched processing capacity in a single chassis. The FX-LINK expansion architecture allows up to six NEXX frames to be interconnected, forming a single 960x960 non-blocking UHD routing matrix while maintaining operational consistency and flexibility.

At booth 1910, EvertzAV will demonstrate how FX-LINK extends NEXX's scalability and versatility, allowing users to seamlessly scale their routing systems without disrupting existing workflows. The system's modular design supports hot-swappable I/O, advanced media processing (including frame sync, up/down/cross conversion, and JPEG XS encode/decode), and integrated multiviewers.

NEXX routers are orchestrated using MAGNUM-OS, providing intuitive control, real-time system monitoring, and analytics, enabling effortless routing, multiviewer control, and seamless integration with SDI, IP, and hybrid workflows. The addition of HDMI and Dante interfaces within the NEXX ecosystem ensures that the platform can meet the needs of diverse AV environments while protecting existing infrastructure investments.

EvertzAV specialists will provide live demos at Booth 1910 throughout InfoComm 2025 and discuss how NEXX with FX-LINK can meet enterprise broadcast and AV distribution needs today and into the future. To book an appointment with the team, please email avsales@evertz.com
