

FOR IMMEDIATE RELEASE

EvertzAV Introduces MMA10G-TRXS4K-UCPT for Unified Collaboration and Content Creation Workflows

Burlington, Canada, June 15, 2026: EvertzAV, a division of Evertz Microsystems Ltd. and a global leader in professional AV-over-IP solutions, will showcase the new MMA10G-TRXS4K-UCPT at InfoComm 2026. Building on the capabilities of the MMA10G-TRXS-UCPT platform, the new model adds UHD (4K60) video support in a compact low-profile design, providing an efficient bridge between professional AV systems and modern collaboration, streaming and content creation applications.

As organizations continue to expand the use of unified communications and hybrid collaboration environments, there is increasing demand for high-quality UHD video sources to be integrated directly into conferencing, recording and streaming workflows. The MMA10G-TRXS4K-UCPT addresses this challenge by enabling AV-over-IP and local video sources to be presented directly to software applications as an audio-enabled webcam source.

The MMA10G-TRXS4K-UCPT combines IPMX-certified AV transport with integrated USB capture functionality, allowing users to connect professional AV systems to popular collaboration and content creation platforms without additional conversion equipment. Support for scaling and audio integration provides flexibility for a wide range of presentation and production environments.

Designed for modern AV deployments, the new low-profile chassis supports 4K60 workflows while simplifying installation in space-constrained environments. The platform integrates seamlessly with EvertzAV's MMA10G ecosystem and MAGNUM-AV management platform, providing centralized configuration and control across AV-over-IP infrastructures.

By bridging professional AV systems with software-based collaboration tools, the MMA10G-TRXS4K-UCPT helps organizations maximize the value of existing AV investments while supporting evolving communication, training and content creation requirements.

To learn more about the MMA10G-TRXS4K-UCPT and EvertzAV's portfolio of AV-over-IP solutions, visit EvertzAV at InfoComm 2026, Booth **C8516**, or if you'd like to book a meeting please contact avsales@evertz.com.
